## QLD CHILD SAFETY TRAINING MODULES

### ABOUT CHILDSAFE TRAINING

ChildSafe Australia has a range of training developed for those who work with children, youth and vulnerable people. Based on the 10 National Principles for child safe organisations and QLD Child Safe Standards, ChildSafe's comprehensive training empowers staff to create safer environments for children and young people.

ChildSafe, a Children's Harm Prevention Charity, brings over 15 years of experience in the child safety management sector. It's training supports a range of responsibilities applicable in community organisations. Each of the core standard modules builds on the one below it, according to responsibility, building safety capacity across the organisation. ChildSafe can also tailor your organisation's training to consider local jurisdiction (e.g. state laws), context (e.g. council, sports, schools, clubs, church scenarios) and your organisational needs.

### CHILDSAFE TRAINING MODULE LEVELS

## CORE TRAINING MODULES

ChildSafe's Core training units are based on the 10 National Principles for child safe organisations and **10 QLD Child Safety Standards**. ChildSafe's Core Training Units combine these broad national and state principles into an actionable system to empower your organisation to develop a culture of Safe People, Safe Places and Safe Programs for children and vulnerable people.

### LEVEL 1

An introductory module specifically for child-facing roles. Level One provides a base of training suitable for all staff and volunteers. Level 1 supports organisation Child safety policies, procedures and reporting processes.

#### Content

- Why Child Safety?
- **Review of the 10 National Child Safety Principles 10 QLD Child Safe Standards**
- Creating safety through empowerment & participation.
- Recognising abuse, responding and reporting
- Tools that support us in child safety
  - Code of Conduct
  - Child Safety policy
  - Incident reporting
- Child Safety Scenarios

### LEVEL 2

Building on Level One, Level Two is for leaders who are involved in working within your programs, usually leading a team.

#### Content

- Supporting a culture of safety as a team leader
- Creating a culture of empowerment & inclusion
- Building a safe team
- Creating a safe environment
  - Child Safety Risk assessment
- Supporting a culture of reporting
- Scenarios and discussions

### LEVEL 3

Level Three is designed for organisations who are **"Getting Started"** in developing their Child Safety systems and processes.

Level 3 is designed for people who are involved in the practical oversight of your programs and policies. They also usually have a prime role in managing the response to serious incidents, eg: Child Safety Officers (CSO), People and Culture, Dept Managers.

#### Content

- Child Safe Standards and minimum requirements
- Developing Core Policies
  - Statement of commitment
  - Child Safety Policy
  - Code of Conduct
  - Complaints and reporting
- Child safe Environments
- Child Safety Risk management
- Reviewing & improving child safety practices
- Child Safety Action plan

### LEVEL 4

Level 4 is designed for organisations that have **"Established Child Safety Systems"**.

Level 4 assists Leadership to ensure that the organisation is practically implementing Child Safety policies and procedures, properly and effectively.

Level 4 engages participants in workshop style discussions that expand their understanding of key child safety tools and policies. Level 4 engages organisations leadership to consider how to practically apply child safety to actual context and the day to day "Grey spaces" where risks occur.
